

## **Chapter 4: Spark DataFrames**

## Ex3: walmart\_stock

There are some basic questions about some stock market data, in this case Walmart Stock from the years 2012-2017.

Use the walmart\_stock.csv file to Answer and complete the tasks below!

Start a simple Spark Session

```
Load the Walmart Stock CSV File, have Spark infer the data types.

In [66]:

What are the column names?

In [67]:

Out[67]: ['Date', 'Open', 'High', 'Low', 'Close', 'Volume', 'Adj Close']

What does the Schema look like?

In [68]:

root

|-- Date: timestamp (nullable = true)
|-- Open: double (nullable = true)
|-- High: double (nullable = true)
|-- Low: double (nullable = true)
|-- Close: double (nullable = true)
|-- Volume: integer (nullable = true)
|-- Adj Close: double (nullable = true)
|-- Adj Close: double (nullable = true)
```

Print out the first 5 rows.

In [76]:

Row(Date=datetime.datetime(2012, 1, 3, 0, 0), Open=59.970001, High=61.060001, Low=59.869999, Close=60.330002, Volume=12668800, Adj Close=52.61923499999996)

Row(Date=datetime.datetime(2012, 1, 4, 0, 0), Open=60.20999899999996, High=60.349998, Low=59.470001, Close=59.7099989999996, Volume=9593300, Adj Close=52.078475)

Row(Date=datetime.datetime(2012, 1, 5, 0, 0), Open=59.349998, High=59.619999, Low=58.369999, Close=59.419998, Volume=12768200, Adj Close=51.825539)

Row(Date=datetime.datetime(2012, 1, 6, 0, 0), Open=59.419998, High=59.450001, Low=58.869999, Close=59.0, Volume=8069400, Adj Close=51.45922)

Row(Date=datetime.datetime(2012, 1, 9, 0, 0), Open=59.029999, High=59.549999, Low=58.919998, Close=59.18, Volume=6679300, Adj Close=51.616215000000004)

## Use describe() to learn about the DataFrame.

Tn	77	
TII I	//

01	80898100				,	
+	+	+		+	+-	
+		+		+		

There are too many decimal places for mean and stddev in the describe() dataframe. Format the numbers to just show up to two decimal places. Pay careful attention to the datatypes that .describe() returns, we didn't cover how to do this exact formatting, but we covered something very similar. Check this link for a hint

(http://spark.apache.org/docs/latest/api/python/pyspark.sql.html#pyspark.sql.Column.cast)

```
In [78]:

|2012|77.599998|
|2016|75.190002|
```

What is the average Close for each Calendar Month?

In other words, across all the years, what is the average Close price for Jan,Feb, Mar, etc... Your result will have a value for each of these months.

## In [121]:
